IN THE SPECIFICATION

Please replace paragraphs [0010] and [0045] with the following amended paragraphs:

[0010] The present invention is directed to a system and methods which accept content from a variety of sources and through a variety of system, apparatuses, and methods and can process the content to provide modified content in a variety of formats to individuals with varying disabilities. Inputted content may embody any type of format, including a text file, a ~~Microsoft Word~~ MICROSOFT WORD word processing software file, an ~~Adobe Acrobat~~ ADOBE ACROBAT computer program File, an HTML document, an XML document, an xHTML document, a ~~Quark Express~~ QUARK XPRESS computer application document, a ~~Word Perfect~~ WORDPERFECT word processing application document, an SGML document, and an ~~Adobe PageMaker~~ ADOBE PAGEMAKER desktop publishing program document. The content can then be converted into an XML format. If data is embedded in the content that allows for the construction of a DOM tree, such is constructed. Otherwise, it can be assembled from a scan of the content. Modified or converted content can then be outputted into an output device.

[0045] Content input 173 may be provided through wire, wireless, in analog form or in digital form, and may be delivered in any number of formats. Content input 173 may include information already in digital format or information in other formats including a printed page or audio recording. Illustrative of digital content that may be used as content input 173 are a text file, a ~~Microsoft Word~~ MICROSOFT WORD word processing software file, an ~~Adobe Acrobat~~ ADOBE ACROBAT computer program File, an HTML document, an XML document, an xHTML document, a ~~Quark Express~~ QUARK XPRESS computer application document, a ~~Word Perfect~~ WORDPERFECT word processing application document, an SGML document, and an
